Allowable Subject Matter

Claims 14 and 17-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or render obvious a method of chemical mechanical polishing comprising: supplying slurry including polishing particles to a polishing apparatus including a polisher and an object to be polished; measuring particle information including at least one of dispersion of the polishing particles and distribution of particle sizes of the polishing particles of the slurry that is directly supplied to the in the polishing apparatus; and controlling the polishing speed at which the object is being polished, based on the particle information by adjusting at least one of rotation speed of the polisher, rotation speed of the object, and force applied by the polisher to the object.

Applicant's arguments (pages 3-5) regarding the previous rejection of claim 14 based on Yueh alone have been considered, but are not persuasive. Yueh contains an enabling disclosure as would be recognized by one of ordinary skill in the art of chemical mechanical polishing and process control. However, the argument is moot since applicant has amended claim 14 to include limitations of claim 16, which was previously rejected over Yueh in view of Shelton. The combination of Yueh and Shelton to arrive at the invention of amended claim 14 is deemed improper, since Shelton does not measure the dispersion or distribution of polishing particles of slurry that is directly supplied to the object, but instead detects for the presence of particles that are in the polished object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
